Profile

As a passionate and detail-oriented Front-End Developer, I thrive on creating innovative web solutions that enhance user experiences. With a strong foundation in HTML, CSS, and JavaScript, and expertise in React, I have successfully designed, developed, and maintained dynamic web applications. My collaborative approach has allowed me to work seamlessly with cross-functional teams, driving project success and delivering high-quality results. Continuously learning and adapting, I stay current with industry trends to ensure my skills remain sharp and relevant.

Education

Jan 2020 – present
Nigeria

Student Of Science In Plant Science And Biotechnology
University Of Port Harcourt

Professional Experience

Aug 2023 – May 2024

Frontend Developer

Inventory Management System (IMS)

- Collaborated in the development of a new web application, resulting in a 30% increase in user engagement.
- Collaborated with UI/UX designers to implement responsive and visually appealing user interfaces.
- Conducted regular code reviews to ensure code quality, adherence to best practices, and knowledge sharing with the team

Skills

Programming Languages

Javascript, Typescript

Web Technologies

HTML, CSS, React.js, Node.js, Express.js

Databases

MongoDB, Firebase

Frameworks

Tailwind CSS

Version Control

Git, Github

Tools

Rapid Api, Redux Toolkit

Libraries

MUI (Material-UI), Framer Motion

Projects

Fifa Stream

- **Description:** A blockchain site for football enthusiasts
- **Technologies:** Html, Css, React, Tailwindcss, Framer motion
- **Key Points:**
 - Developed the frontend, creating a seamless and responsive user interface
 - Collaborated closely with a blockchain developer to integrate blockchain functionalities
 - Implemented interactive UI components and animations using Framer Motion

- Ensured cross-browser compatibility and optimized performance for a smooth user experience
- Utilized Tailwind CSS for efficient and consistent styling across the platform

Real Estate [↗](#)

- **Description:** A full stack estate management platform
- **Technologies:** Html, Css, React.js, Tailwindcss, Node.js, Express.js, MongoDB, Firebase
- **Key Points:**
 - Utilized React.js and Tailwind CSS to create a responsive and visually appealing front-end, ensuring a seamless user experience across various devices.
 - Built a robust backend using Node.js and Express.js to handle server-side logic, user authentication, and database interactions.
 - Employed MongoDB as the primary database to store property listings, user information, and other essential data, ensuring efficient data management and retrieval.
 - Integrated Firebase for real-time database management and user authentication, as well as for uploading pictures for property listings, enhancing the platform's functionality and user experience.
 - Implemented features such as property listings, user profiles, and email notifications to landlords for inquiries about specific listings, allowing effective communication and management.
 - Faced and overcame challenges in synchronizing real-time data between the front-end and back-end, improving my skills in full stack development.

Ecommerce Sneakers Store [↗](#)

- **Description:** An e-commerce platform for sneakers
- **Technologies:** Html, Css, Reactjs, Material-UI, Framer motion
- **Key Points:**
 - Developed and implemented a dynamic and responsive e-commerce platform for sneakers using React.js. The project aimed to provide users with a seamless and visually appealing shopping experience for a diverse range of sneaker products.
 - Implemented a comprehensive product catalog with categorization, allowing users to explore a wide range of sneakers efficiently.
 - Utilized Material-UI to design and implement an intuitive user interface, ensuring a consistent and modern look across the platform.
 - Faced and overcame challenges using Framer Motion for the checkout section, improving my skills in creating engaging animations and transitions.

Exercise app [↗](#)

- **Description:** A dynamic fitness web application
- **Technologies:** Html, Css, Reactjs, Material-UI
- **Key Points:**
 - Developed a responsive exercise web application that provides a user-friendly platform for workout routines.
 - Implemented features such as exercise videos, body part exercises and BMI calculator.
 - Utilized RapidAPI to fetch data in React.js, enhancing my proficiency in data integration and API handling.

YouTube Clone [↗](#)

- **Description:** A functional youtube clone
- **Technologies:** Html, Css, Reactjs, Material-UI, Rapid Api
- **Key Points:**
 - Implemented features such as video uploads, video playbacks, Users can seamlessly browse and view videos according to their searches and other related videos.
 - Utilized RapidAPI to fetch data in React.js, enhancing my proficiency in data integration and API handling.
 - Overcame challenges of fetching data from RapidAPI and using Material-UI, as it was my first time working with these technologies.
