Profile

Full-Stack Software Developer with 5 years of experience architecting and shipping scalable, high-performance web applications across fintech, real estate, e-commerce, and SaaS domains. Proficient in building pixel-perfect, responsive UIs with React.js, Next.js, and TypeScript, and engineering secure RESTful APIs with Node.js, Nest.js, and PostgreSQL. Experienced integrating real-time features via WebSockets, AI-powered capabilities via OpenAI/LangChain, and DevOps workflows with Docker and GitHub Actions. Recognized for clean, maintainable code, strong cross-functional collaboration, and consistently delivering projects that exceed business objectives.

Skills

Technical Skills

- **Frontend:** HTML, CSS, JavaScript (ES6+), TypeScript, React.js, Next.js, Svelte, Redux, Zustand, TanStack Query, Context API, Framer Motion, React Hook Form, GSAP, Tailwind CSS, SCSS, Material UI
- **Backend:** Node.js, Express.js, Nest.js, Prisma ORM, Type ORM, PostgreSQL, MongoDB, MySQL, Firebase, Supabase, Neon, JWT, Bcrypt, Helmet.js, BullMQ, Redis, WebSockets, Cloudinary
- **AI & Machine Learning:** OpenAI API, LangChain, AI-powered chatbots, AI prompt engineering, REST API integration for AI services
- **Performance & Testing:** Jest, Vitest, Supertest, Lazy Loading, Code Splitting, Web Vitals Optimization
- **DevOps & Tools:** Git, GitHub, GitHub Actions, Docker, Vercel, Netlify, cPanel, Postman, REST APIs, Figma
- **Practices:** Agile/Scrum, Git Flow, Code Reviews, UI/UX Optimization, Accessibility (WCAG), Performance Auditing

Soft Skills

- Problem-Solving & Debugging
- Cross-Team Collaboration
- Clear Communication & Documentation

Professional Experience

Jan 2026 – Present
Port Harcourt, Nigeria.
Onsite

Frontend Engineer Egoras

- Collaborated with cross functional frontend and backend teams to build and ship a full-featured fintech trading platform, including an admin panel trading dashboard, and broker white label pages.
- Engineered real-time trading interfaces using WebSockets, enabling live price feeds, order book updates, and trade execution flows with sub-second latency.
- Built a white-label broker portal with configurable branding, theming, and dynamic data rendering to support multiple broker clients from a single codebase.
- Developed the admin panel with role-based access control, user management, transaction monitoring, and reporting dashboards.
- Managed global UI state using Zustand for complex trading workflows, ensuring predictable data flow across deeply nested components

- Implemented responsive, accessible UI components with React.js and Tailwind CSS, ensuring consistent cross-device and cross browser experiences.

Aug 2025 – Jan 2026
Remote

Full-Stack Software Developer (Contract)

JGlobalProperties 

- Architected and built a full-stack real estate platform end-to-end, including a public-facing site (property/land listings, blog, events, newsletter) and a custom admin CMS, using Next.js 15, TypeScript, and a NestJS/Prisma/PostgreSQL backend.
- Designed a normalized PostgreSQL schema with Prisma covering properties, land units, reviews, blog content, tagging, media, and newsletter campaigns, supporting polymorphic image relations across multiple content types.
- Built a custom admin CMS with a rich-text editor (TipTap) for blog and content management, including categories, tags, events, and media handling with Cloudinary integration.
- Implemented an interactive property search experience using Leaflet maps with custom markers, popups, and geolocation-based filtering across Nigerian cities and states.
- Developed a full newsletter system (subscribe/unsubscribe, campaign creation and sending, delivery tracking, CSV export) and a review moderation workflow with bulk approve/reject actions, using NestJS and Resend for transactional email.
- Secured the platform with JWT-based authentication, route-level middleware protection, and role-gated admin access;
- Optimized frontend performance with server-side caching, lazy loading, and a modular feature-based architecture (API clients, hooks, and types per domain) for long-term maintainability

Nov 2024 – Sep 2025
Remote

Frontend Developer

Smart Task AI 

- Designed and implemented intuitive user interfaces across STAI's responsive platform, ensuring seamless experiences across desktop and mobile devices.
- Enhanced navigational flows and UI components using modern web technologies (e.g., React.js, Next.js, Tailwind CSS, Framer Motion), increasing user engagement and reducing friction.
- Collaborated with backend teams to integrate front-end layers with APIs, ensuring accurate rendering of dynamic data and seamless data flow.
- Applied performance optimization techniques such as lazy loading, code splitting, and image optimization to improve page load speed and overall responsiveness.
- Worked closely with UI/UX designers to translate design concepts into pixel-perfect interfaces, maintaining visual consistency across features.
- Implemented accessibility best practices to improve platform usability for a wider range of users (e.g., keyboard navigation, semantic HTML, ARIA labels).

May 2024 – Apr 2025
Remote

Frontend Developer

SophNex Solutions

- Built dynamic **UI components**, improving reusability and reducing code duplication by **40%**.
- Optimized image rendering and lazy loading, cutting page load times by **40%**.
- Collaborated with backend engineers to ensure seamless **API integration**, reducing data transfer time by **30%**.
- Enhanced overall **user experience and performance**, improving load times and interactivity.

May 2023 – Jun 2024
Remote

Frontend Developer

Cartly

- Spearheaded the **UI redesign**, improving customer retention by **20%** through a modern and responsive layout.

- Developed **responsive and visually appealing** UI components in **React.js** and **Tailwind CSS**.
- Conducted **code reviews** to ensure code quality, maintainability, and best practices.
- Designed interactive elements with **Framer Motion** and **GSAP**, enhancing UX engagement.
- Optimized application performance, reducing **load time by 25%** through efficient state management and lazy loading.

Projects

Ecommerce Furniture Site(Next.js, TypeScript, Tailwind CSS, Framer Motion, Redux, Jest)

- Developed a **dynamic product catalog** with filtering & sorting, increasing session time by **20%**.
- Implemented **lazy loading** for product images, reducing page load time by **30%**.
- Designed interactive **UI animations with Framer Motion**, enhancing user engagement.
- Utilized **Redux for efficient state management**, improving data flow and performance.
- Built a **dedicated admin panel** for site management, including product display control, inventory management, and order tracking.
- Ensured **scalability and type safety** by leveraging **TypeScript** best practices.
- Implemented **unit and integration testing with Jest**, ensuring application reliability.

Doughnation — Donation Management Platform (Next.js, TypeScript, Tailwind CSS, Framer Motion, Express.js, Prisma, PostgreSQL, Docker)

- Built a full-stack donation management platform with fund selection, amount entry, and secure payment handling via a multi-step form.
- Developed backend APIs using **Express.js & Prisma ORM** with PostgreSQL, hosted on **Supabase**, and containerized using **Docker** for consistent deployments.
- Implemented authentication and role-based access for administrators, improving data security and access control.
- Designed responsive, animated UI components using **Next.js**, Tailwind CSS, and Framer Motion.
- Deployed frontend to **Vercel** and backend via **Docker**, ensuring scalability and reliability.

Education

Jan 2020 – Oct 2024	Student Of Science In Plant Science And Biotechnology
Nigeria	<i>University Of Port Harcourt</i>

Organizations

Sep 2023 – Oct 2024	Microsoft ADC Student League
	<i>Member</i>
